- Model of S. African locomotive

ONE SHILLING • 4 JUNE 1959
VOL 120 • NO 3028

Still steaming

Maybe that kind of fate does not overtake all locomotives built to ME specifications, but at least *Brunel* is still running.

Of the Rhyl Publicity Exhibition, Brigadier Richards remarks that his society operated eight locomotives during the six-day event, the smallest being the chairman's *Dyak* and the largest Andrew Todd's 5 in. *Princess Marina*.

The North Wales society received some assistance from Mr James, of the Deeside club, whose new *Ajax* proved remarkably efficient on the shunting-run necessary on such a short temporary track.

Brigadier Richards driving Brunel on the portable track.
